COMPOSITE DECKING

BAMBOO COMPOSITE PRODUCT LINE

BAMBOO COMPOSITE PRODUCT LINE

ZomeTek's Bamboo Composite Decking is manufactured using an advanced type of composite material. It is made by mixing natural bamboo fiber with 100% recycled plastics and high-quality additives for color and anti-mildicide. This construction-grade material is a strong, moisture-resistant composite, engineered to endure abuse of all types including rain, rot, snow, ice, sand and heavy traffic. The surface looks great with its natural wood appearance and requires minimal maintenance.

Available in a range of colors and plank and tile formats, ZomeTek Bamboo Composite Decking planks and tiles are a safe, environmentally-responsible alternative to traditional wood decking. Furthermore, ZomeTek decking is generally priced 20 percent less than comparable composite decks and is backed by a 25-year residential warranty.

ENVIRONMENT

Made of highly sustainable bamboo and 100% recycled plastics. Contains no formaldehyde.

CONSTRUCTION

Bamboo fiber, recycled plastic (HDPE), and additives to preserve color and durability.

DURABILITY

Extreme durability against sun, heat, freezing, rot, salt, sand and heavy traffic. Minimal fading means no re-staining.

WARRANTY

We stand by the quality of Zometek decking with a 25 year residential and 10 year commercial warranty.

ZOMETEK xBEAM DECKING

ZomeTek's xBEAM composite decking can be routed, ripped and face screwed just like normal wood decking. The eco-friendly, recycled construction resists stains, mold, mildew, and more. It also does not require any staining, painting, or sealing, and the beautiful colors will last a lifetime.

The planks are reversible, offering a ridged or brushed appearance and can be installed via face screws or hidden fastener system. ZomeTek decking is backed by a 25-year residential (10-year commercial) limited warranty.
